Weilgut CRM Suite

Rely on a software solution for Lotus Notes that allows targeted establishment and maintenance of lasting and profitable customer relationships. Weilgut CRM Suite ideally supports your sales, marketing, project planning, and service as an integrated solution with individual user interfaces.

Think big, start small

You don't want to spend money on long runtimes for the introduction of a company-wide CRM system? Then rely on our modular solution and long-standing experience as well as a future-proof solution that covers your company processes. One application for all and individual applications for one means that every user will immediately experience the benefit through step-by-step activation of individual elements. Your user quickly gets started and gradually increases productivity. This lastingly ensures user acceptance and your CRM Suite will be implemented quickly and effectively.

Exceptional for a CRM system: Control orders from sales directly in the project planning and then in the service. Fully integrated modules of the CRM Suite quickly turn consistent customer management into reality. The user rights management in the background meets the requirements of different users and sensitive data.

We have been developing CRM solutions since 1989. Put your trust in us.

One face to the customer

Gain a 360° view of your customers: in company management, in marketing and sales, in project planning, and in your service. Ideally care for your customers and design new customer sales more successfully with the Weilgut CRM Suite. These coordinated modules ensure more productive customer communication:

- **Workspace:** navigation system and user guidance for the CRM Suite
- **Address:** contact management and mailings
- **Office:** document, file, records, and e-mail management
- **Contact:** sales information system with offer, lead, and opportunity management
- **Event:** marketing, telemarketing, campaign, and event management
- **Coordinator:** project and resource planning of orders
- **Helpdesk:** solution for the service
